• Students' Representative

## EXPERIENCE

**COAPPS.AI** | Python Full Stack Developer Intern
January 2024 - Present | Chennai, India

FRONTEND DEVELOPMENT
- I created the front end from scratch using HTML, CSS, JS, and internal frameworks, creating a better user experience.
- Creating reusable components to optimize code and speed of web app.

BACKEND DEVELOPMENT
- Designing a relational database schema using MySQL to store information about products, categories, users, orders, and transactions.
- Implementing user authentication functionality to allow users to register, login, and manage their accounts securely.
- Optimizing database queries, caching frequently accessed data, and minimizing server response times to improve overall system performance.

**PANTECH E-LEARNING** | MERN Stack Development Intern
Oct 2023 – Sept 2023 | Trichy, India
- Developed responsive and user-friendly web applications using the MERN Stack.
- Employed React for building interactive and user-friendly front-end interfaces.
- Utilized Git for version control, ensuring a collaborative and organized development process.

## PROJECTS

**OMNIFOOD** | Front End Based Project
Checkout **live project**.
- Omnifood is an online platform dedicated to food ordering, providing convenient daily delivery services.

**HOODIES SHOP** | Front End Based Project
Checkout **live project**.
- This platform offers a curated collection of stylish and comfortable hoodies for all occasions.

**COFFEE SHOP** | Front End Based Project
Checkout **live project**.
- Created a visually appealing coffee shop website using HTML and CSS.

**CHAIRS STORE** | Front End Based Project
Checkout **live project**.
- Designed a chairs store website using HTML and CSS.

## AWARDS

2018    I attained the third rank at the school level in 10th public examination.
2016    I successfully passed the National Means-Merit Scholarship (NMMS) exam.
